English (native) • Spanish (C1) • Seeking opportunities in GIS, mobility, and smart cities

PROFILE

Policy researcher and urban data analyst with experience producing data-backed analysis for government institutions, international development organizations, and public administrations. Background spans geospatial analysis applied to urban mobility and environmental sustainability, international policy research contributing to European Commission submissions, and academic work on urban resilience, climate risk, and city governance. Bilingual English–Spanish with strong written and oral communication skills for both specialist and non-specialist audiences.

TECHNICAL SKILLS

GIS & spatial analysis: ArcGIS Pro (advanced), QGIS (advanced), Network Analyst, GRASS, GDAL/OGR, raster/vector analysis, ArcGIS Online, ArcGIS Enterprise (working knowledge), Survey123, Experience Builder, GTFS

Data & programming: Python (competent), Excel (advanced), R, spatial database management, environmental data modelling

Design & communication: Adobe Illustrator, Photoshop, PowerPoint — bilingual technical report writing (English/Spanish)

Beginner: AutoCAD, Revit, Bentley iTwin

PROFESSIONAL EXPERIENCE

GIS & Urban Data Analyst (Internship) | Ayuntamiento de Madrid — *Subdirección de Innovación e Información Urbana* | Apr 2026 – Jul 2026

- Conducted spatial analysis and modelling for urban mobility policy, including pedestrian network optimization across 12 municipal work centers (ArcGIS Pro, Network Analyst), producing route recommendations adopted in sustainability policy proposals.
- Built a Seasonal Pedestrian Accessibility Index integrating slope, solar radiation and sidewalk width data across the full Madrid street network, translating multi-variable spatial databases into a composite indicator for policy decision-making.
- Performed NDVI vegetation analysis of Parque del Retiro using multitemporal satellite imagery to assess urban green cover change — directly applicable to nature-based solutions and urban environmental monitoring.
- Developed a multicriteria spatial evaluation framework for new urban tree pit locations integrating shadow, slope and coverage layers — a methodology applicable to urban biodiversity assessments.
- Produced technical reports and cartographic outputs used as evidence in accessibility and sustainable mobility policy decisions at municipal level; invited to present findings at the Jornada de Geodatos (November 2026) hosted by the Ayuntamiento de Madrid.
- Worked within ArcGIS Enterprise environment (Server, Portal, enterprise geodatabase); hands-on use of ArcGIS Online, Experience Builder, and Survey123 for field data management.

English Language Assistant | Comunidad de Madrid — *IES Alonso Quijano / Colegio Santa María la Blanca* | Oct 2022 – Jun 2025

- Designed and delivered English curriculum to groups of up to 15 students; co-developed bilingual frameworks adopted school-wide — demonstrating capacity to organize and present complex material to diverse audiences.

Canvass Supervisor | Georgia CAN — *Atlanta, GA* | May – Jul 2022

- Led a team of 15–25 field surveyors contacting over 8,000 registered voters using geo-targeted voter databases to direct field strategy. Team recognized as most productive nationally; candidate won by 2,000 votes.

Research Intern, Corporate Partnerships | CARE USA — *Washington, DC* | Aug – Dec 2021

- Produced a cross-sector analysis of the cocoa supply chain industry presented to teams across three continents, directly informing CARE's position paper submitted to the European Commission on supply chain sustainability.
- Created geospatial maps of CARE intervention programs across West Africa for major international donor presentations, demonstrating experience communicating complex data to non-specialist policymaker audiences.
- Engaged with corporate stakeholders across multiple jurisdictions, building institutional relationships in an international development context.

EDUCATION

Master's in Smart and Sustainable Cities | Universidad Complutense de Madrid | 2025 – 2026 (pending thesis)

Relevant coursework: Urban mobility and transport · Climate resilience and city governance · Geospatial data analysis · Sustainability indicators and reporting · Urban environmental policy

Research:

- Flood risk and urban resilience analysis, Logroño, Spain (ArcGIS Pro, hydrological modelling)
- Hospital accessibility diagnostic, Atlanta, GA (modal split analysis, spatial accessibility indices)

Double B.A. Political Science & International Affairs | University of Georgia, Athens, GA, USA | 2018 – 2022

Coursework in comparative politics, international development, environmental policy, and quantitative research methods.

CERTIFICATIONS & TRAINING

- QGIS & GRASS – 80-hour professional course, Grupo TYC GIS Formación (Feb–Apr 2025): raster/vector analysis via GDAL/OGR libraries, GRASS integration for digital image processing and advanced geospatial analysis
- TEFL Certificate – CIEE (Council on International Educational Exchange)

LANGUAGES

English — Native | Spanish — C1 (full professional proficiency)
